**Founded, Based and  
MADE IN THE U.S.A.**

Rapid Setting Cement Based  
Hydraulic Cement

## DESCRIPTION:

PRO PLUG 45 is a hydraulic cement formula designed to set at three (3) times the speed of ordinary quick set plug. Instant setting can be achieved in 45 seconds to stop pressure leaks in concrete and masonry surfaces. This rapid set allows PRO PLUG 45 to bond mechanically and chemically to saturate surfaces.

## USES AND APPLICATIONS:

- Stops Streaming Leaks in Concrete
- Anchors Bolts and Rods
- Seals Cracks and Floor and Wall Junctions

## PRODUCT FEATURES:

- Non-Metallic, Non Rusting
- Fast Setting
- Stops water leaks under pressure
- Easy to mix
- Single component
- Expands as it sets
- Waterproof
- Chloride and metal free mortar
- Freeze-Thaw stable
- Can be shaved and molded to desired contour
- Once set, Pro Plug 45 is resistant to hydrostatic pressure

## SUBSTRATE PREPARATION:

Slightly undercut the hole to be plugged and enlarge small cracks to permit embedment of material. Recommended minimum size of hole or crack is 0.75 in. wide and deep. Remove all loose dirt or aggregate. Surfaces should be SSD (Saturated Surface Dry) prior to placement

## MIXING:

Mix PRO PLUG 45 with clean potable water. Add just enough to make a putty consistency. Water ratio is 3 parts powder to 1 part water. PRO PLUG 45 is to be mixed in small quantities only due to rapid set time.

## APPLICATION:

Apply PRO PLUG 45 with trowel or by hand to seeping area starting at top of crack. Hold firmly in place exerting pressure with hand or trowel for about 3 minutes to be sure PRO PLUG 45 does not wash out under water pressure. If small leaks should appear around the patched area, sprinkle PRO PLUG 45 in a dry form onto the leaking area, or mix a small batch of PRO PLUG 45 to a soft putty consistency and hold firmly over area till set.

**STOP STREAMING WATER:** Begin at top of crack and place PRO PLUG 45 in firmly using some force to place into opening. Continue to apply pressure with trowel or by hand until material sets and active water has stopped.

**SEALING CRACKS, FLOOR /WALL JUNCTIONS:** Firmly push PRO PLUG 45 into crack or hole to form a cove at the floor and wall junction.

**ANCHORING BOLTS OR RODS:** Drill or chisel a hole deep enough to hold bolt or rod securely and a large enough opening, 1/2" space on all sides of bolt or rod. Position the bolt in the hold, use a small pointed trowel and fill in PRO PLUG 45 completely around bolt. Smooth off surface with trowel while supporting bolt with hand for about one minute until it does not sag.
